The Strategic Management of Intellectual Capital and Organizational Knowledge Mar 16 2022 Increasingly, the challenge of management is to create and supply knowledge in order to sustain organizational performance. However, few books on management strategy have been written using this concept as a foundation. This unique volume adopts a knowledge-based approach that will complement and perhaps supplant other perspectives. Editors Nick Bontis and Chun Wei Choo look at the literature through the lens of strategic management and from the vantage point of organizational science. The thirty readings have been carefully selected and commissioned to provide the best literature available--from articles newly written for this book and from existing publications.

Classic Cars Nov 19 2019 The great thing about the classic car is that you don't have to be a millionaire to join the club! You will recognise many of the cars featured in this book and you may even remember your parents or grandparents driving one from your childhood, that will invoke happy memories. There is no concrete classification for what constitutes a classic car but for many people it refers to a vehicle that harks back to a bygone age, which as a result means there are fewer specimens on the road. In addition some more up-to-date models are now being categorised as modern classics. This is a collection of some of some of the best classics around with informative backgrounds on their design and manufacture. From Aston Martin to Volkswagen, from family car to supercar, classic cars come in all shapes and sizes, so join us on this trip exploring some of the finest cars ever made.

Internal Combustion Engine in Theory and Practice, second edition, revised, Volume 2 Aug 17 2019 This revised edition of Taylor's classic work on the internal-combustion engine incorporates changes and additions in engine design and control that have been brought on by the world petroleum crisis, the subsequent emphasis on fuel economy, and the legal restraints on

air pollution. The fundamentals and the topical organization, however, remain the same. The analytic rather than merely descriptive treatment of actual engine cycles, the exhaustive studies of air capacity, heat flow, friction, and the effects of cylinder size, and the emphasis on application have been preserved. These are the basic qualities that have made Taylor's work indispensable to more than one generation of engineers and designers of internal-combustion engines, as well as to teachers and graduate students in the fields of power, internal-combustion engineering, and general machine design.

With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Toyota Celica GT-Four Dec 25 2022 This is a

comprehensive study of the career of the Toyota Celica GT-Four. Starting in 1988, three generations of this effective turbocharged four-wheel-drive car - known by enthusiasts as ST165, ST185 and ST205 types - fought for World Championships, and were amazingly successful for almost a decade. All types combined high-performance, great reliability, and superb preparation by Toyota Team Europe (based in Cologne, Germany), their 300bhp/four-wheel-drive chassis package being among the best in the world. Over the years, the cars won some of the roughest events in the world (such as the Safari and the Acropolis), and were also supreme on tarmac, snow and ice, including Monte Carlo. After fighting a running battle with Lancia for years, the Celicas won the World Manufacturers' Championship twice. Its famous drivers included Carlos Sainz (World Champion in 1990 and 1992), Juha Kankkunen (Champion in 1993) and Didier Auriol (Champion in 1994). Never far from controversy, and at times embroiled in technical and regulatory disputes, these cars brought real glamour to the colourful sport of rallying, and were only replaced by an even higher-tech Toyota - the Corolla World Rally Car - in 1997.

Comeback Sep 29 2020 In Comeback, Pulitzer Prize-winners Paul Ingrassia and Joseph B. White take us to the boardrooms, the executive offices, and the shop floors of the auto business to reconstruct, in riveting detail, how America's premier industry stumbled, fell, and picked itself up again. The story begins in 1982, when Honda started building cars in Marysville, Ohio, and the entire U.S. car industry seemed to be on the brink of extinction. It ends just over a decade later, with a remarkable turn of the tables, as Japan's car industry falters and America's Big Three emerge as formidable global competitors. Comeback is a story propelled by larger-than-life characters -- Lee Iacocca, Henry Ford II, Don Petersen, Roger Smith, among many others -- and their greed, pride, and sheer refusal to face facts. But it is also a story full of dedicated, unlikely heroes who struggled to make the Big Three change before it was too late.

Ford Escort RS Cosworth & World Rally Car Jun 19

2022 The Escort RS Cosworth, which started rallying in 1993, was one of the most ingenious designs of all time, and eventually became Ford's most successful since the legendary Escorts of the 1970s. Because it was smaller, lighter, and more nimble than any of the Sierras, the combination of Cosworth power, four-wheel-drive transmission, and an effective aerodynamic package made it a Rally Giant in all conditions. With five World victories in its first season, and success all around the world in later years, it was seen in every continent, in all conditions. To meet a change in regulations, the Escort World Rally Car took over in 1997, and also enjoyed years of success.
