Witness the stylized street version of the most ferocious 4x4 ever produced with its radar-like gauges and its awesome red "fire" button. Introduced with great fanfare at the Detroit Auto Show, the first new GM-sponsored Hummer H2 arrived on-scene in 2000. From its civilian Hummer roots to its ultimate construction and delivery, the full story of the remarkable H2 is delivered in this

fabulously illustrated all-color volume. In the Color Tech series. While AM General is almost totally unknown, it makes some of the most recognizable vehicles in the world including the Hummer, Humvee, and postal Jeeps. During its relatively short life AM General has produced a wide range of commercial and military vehicles including postal service Jeeps and vans, military trucks from the 1/4- up to 5-ton models, military trailers, transit buses, motor home chassis, and more. Inside, widely respected author Patrick Foster gives the reader an in-depth look at AM General and its vehicles with spectacular black and white photographs combined with insightful captions. A treat for all enthusiasts! Part company history, part business tale, and part action novel, Hummer tells the story of the Humvee's rise from a utility vehicle bred for military use to a suburban status-symbol. More than a simple story of GM's clever branding scheme at a perfect juncture in automotive, consumer, and world histories, this book is a cultural dissection of what images make Americans open their pocketbooks so readily, and how buying American consumers was never so easy-or conflicted. - The H2 is a huge hit for GM- Hummer is an American icon like the Corvette and Ford Pickup- This book offers a fun-to-read story- H3 is on its way in 2006- Interest continues to grow in this unique vehicle, with buyers pushing GM production numbers up for the Hummer

American's got their first real look at the Hummer during the first Gulf War. Interestingly, because of the advent of 24-hour news at this same point in time, the Gulf War served as priceless free advertising for AM General's war machine. After seeing the Hummer in action, movie star Arnold Schwarzenegger reportedly helped to convince AM General to prep the Hummer for civilian sales and was one of the first to own one. The attention garnered by Schwarzenegger and other celebrities like Tom Clancy, Shaquille O'Neal, G. Gordon Liddy, and any other high-profile American with \$100,000 to spare spurred General Motors to acquire the Hummer name for a new range of smaller SUV's. With a well-timed second war in Iraq, General Motors saw sales of its Hummer H2 skyrocket, just as "Arnold" prepared for the debut of the third installment of his Terminator movies, which cemented his Hollywood status as the king of action movies since the first battle in Iraq. They say timing is everything. With the exploration of everything from consumer buying habits and American economics to global military action and big-budget Hollywood star power, HUMMER tells the story of how priceless and valuable timing has been for America's largest and most recognizable SUV.

About the Author Martin Padgett is the editor of the Web's Automotive Authority, [www.TheCarConnection.com](http://www.TheCarConnection.com), and contributes regularly to Stuff magazine as the resident "road warrior." He also writes car news and columns for Import Tuner, Edmunds.com, and other publications. Padgett lives in Atlanta's Morningside neighborhood with his partner of seven years and four cats, an ever-changing roster of cars in the driveway, and easy access to the Gulf Coast. "[This book] is a study of America's most controversial personal automobile. Featuring more than fifteen essays, this collection analyzes the Hummer through a wide array of disciplines. The editors, Elaine Cardenas and Ellen Gorman, have divided the essays into four groups: myth and space, myth and body, myth and discourse, and myth as vehicle. An introduction by the editors places the study of the Hummer in a cultural context." -- from cover, page 4.

Los Angeles magazine is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture, entertainment, fashion, art and architecture, and news that define Southern California. Started in the spring of 1961, Los Angeles magazine has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian. Though American Motors never approached the size of Detroit's Big Three, it produced a long series of successful cars that were distinctive, often innovative and in many cases influential. This history examines AMC's cars from the company's formation in 1954 through its absorption by Chrysler in 1987. The Gremlin, Pacer and Eagle vehicles are examined in detail, as are the AMC custom cars of George Barris and Carl Green. The text details AMC's 1980s involvement with the French firm Renault and the design legacy of that joint venture, which includes the Hummer. The evolution of Jeep is covered from the 1960s through the 2000s. Features include some 225 photographs; a listing of AMC / Rambler clubs, organizations and business entities, with contact details; tables of detailed specifications and performance data; data on technical devices, trim packages and all model variations; a comprehensive account of AMC / Rambler appearances in film, television and cartoons. Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. When it entered army service in 1985, AM General's high-mobility multipurpose wheeled vehicle-better known as the Humvee-quickly assumed the status the World War II jeep enjoyed among an earlier generation of soldiers. Humvee at War showcases this iconic vehicle in the many roles and configurations it has taken on over the years-ambulance, troop transport, and armament carrier among them. Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. The HMMWV, better known as the Humvee or Hummer, has set the world standard for army tactical vehicles since its introduction into the US Army in the 1980s. Designed to be the successor to the jeep of World War II with a greater load-bearing capacity, the Humvee has proven to be adaptable to a wide range of roles, including weapons carrier, missile launcher, command vehicle and other specialized types. This book traces the development and use of the Humvee and its variations, including the latest families of armored Humvees used in Iraq in 2003-05, and its adoption in a peacekeeping role the world over. With its characteristic wide track, low silhouette and its distinctively deep exhaust note the Humvee sets itself apart from the range of light utility trucks it replaced. Fully air-portable, the Humvee features an aluminum body seated on a steel ladder chassis, powered by a 190hp V8 engine. Introduced into service in 1985, the Humvee remained pretty much unnoticed until its baptism of fire during the invasion of Panama in Operation Just Cause. It wasn't until almost a year later, in Operation Desert Shield and Desert Storm that the Humvee really came into the public eye. As a result of its newly found fame its manufacturer, American Motors General, started to produce a civilized version for public consumption, with sales and profile boosted by Hollywood patronage. At the same time the Humvee continued to serve in some of the most dangerous US operations undertaken to date. From the streets of Mogadishu to the Balkans, the Humvee developed into a vehicle far removed from its original design intentions. With some 17 variants now in service, from the basic troop carrier to the awesome Avenger Anti-Aircraft system, this Humvee LandCraft title provides the modeler with a rich vein of inspirations and subject. This title looks at the process behind the design and development of the Humvee and how American Motors General were able to fulfill a complex design brief to deliver a single vehicle that was able to replace a host of in-service vehicles. This title will chart how the Humvee grew from a light utility truck into a versatile platform whose modesty hides its potential. With its specially designed track, impressive ground clearance, waterproofed electronics and

ability to carry a one ton load, the first Humvees were light years ahead of the vehicles they replaced. With its unique suspension and transmission systems to its unique engine arrangement this 4x4 is capable of feats normally only afforded to tracked vehicles. With some 17 versions in US service the Humvee fulfills its traditional role as cargo and troop carrier as well as special-weapons platform, ambulances, Direct Air Support vehicles and communications shelter vehicles. After 35 years of service the Humvee has changed from soft skinned run-about to a lightly armored force protection asset. Fitted with a larger engine, interchangeable armor, specially designed escape windows and a unique blast chimney, the Humvee's story is indeed proof that development of military vehicles never stops. For the modeler there is nothing more important than the little things and this image-rich section of LandCrafts' Humvee title delivers the goods. Filled with crisp images that chart the Humvee's development, combined with informative accompanying text, forms an enviable visual guide for the enthusiast and modeler alike. Popular Mechanics inspires, instructs and influences readers to help them master the modern world. An introduction to the history and features of the Hummer SUV. Do you think Chinese tanks and models are not interesting? Wait to see this book ... Until now is the most complete, detailed and exhaustive study about PLA for modelers ever done. This book is not only having historians in mind but also for modelers and readers that can be interested to know something more about the Chinese army power. After reading this book many modelers will have much more interest in building a Chinese vehicle as next model. Through its pages we will discover not only the power and main weapons of the Chinese PLA since its origins, but also the way to paint them, showing different techniques and camouflages for the Chinese vehicles. The kits which appear in this book, belong to the main Chinese brands, and makes this book the perfect guide not only for modelers and enthusiasts of Chinese tanks and its strange and exotic camouflages but also for any modelers that want to have a reference book. Modelers and historians like Adam Wilder, Kristof Pulinks, Lukasz Orczyk-Musialek, Lester Plaskitt, Sven Frich, Zach Sex, Gordon Arthur, Lei Xu, Verlag Jochen, Chris Jerret, Oscar Ebrí, Brian Murdoch or David Bocquelet give us an idea of the quality of this publication that until now is the most complete, detailed and exhaustive study about PLA for modelers ever done. This book focuses on the law of commercial contracts as constructed by the US and UK legal systems. Leading scholars from both sides of the Atlantic provide works of original scholarship focusing on current debates and trends from the two dominant common law systems. The chapters approach the subject areas from a variety of perspectives - doctrinal analysis, law and economic analysis, and social-legal studies, as well as other theoretical perspectives. The book covers the major themes that underlie the key debates relating to commercial contract law: role of consent; normative theories of contract law; contract design and good faith; implied terms and interpretation; policing contract behavior; misrepresentation, breach and remedies; and the regional and international harmonization of contract law. Contributors provide insights on the many commonalities, but more interestingly, on the key divergences of the United States and United Kingdom's approaches to numerous areas of contract law. A nostalgic look at the world's best-loved and most significant automobiles Drive down memory lane with this celebration of 150 of the world's greatest cars, from the weird and wonderful to the largest, fastest and most infamous. From 0 to 150 take a journey through the first steam-powered vehicles and the Model T Ford, to favourites like the James Bond amphibian car, the holder of the supersonic land speed record and the latest Air car recently hailed as the true car of tomorrow. Just the thing for boys of all ages! The all-new Hummer H3 will reach market in early 2005, just as this book chronicling its development is published. The H3 will offer traditional Hummer off-road durability and stump-pulling power in a smaller, more-affordable SUV-styled package. Interest in the new model is very high and the automotive website "edmunds.com" reported, "... the smaller and cheaper H3 is likely to become the most popular Hummer ever." Marketing and consumer research has traditionally conceptualized consumers as individuals- who exercise choice in the marketplace as individuals not as a class or a group. However an important new perspective is now emerging that rejects the individualistic view and focuses on the reality that human life is essentially social, and that who we are is an inherently social phenomenon. It is the tribus, the many little groups we belong to, that are fundamental to our experience of life. Tribal Marketing shows that it is not individual consumption of products that defines our lives but rather that this activity actually facilitates meaningful social relationships. The social 'links' (social relationships) are more important than the things (brands etc.) The aim of this book is therefore to offer a systematic overview of the area that has been defined as "cultures of consumption"- consumption microcultures, brand cultures, brand tribes, and brand communities. It is though these that students of marketing and marketing practitioners can begin to genuinely understand the real drivers of consumer behaviour. It will be essential to everyone who needs to understand the new paradigm in consumer research, brand management and communications management. For the 2007 Edition, leading authorities in over 24 specialized areas review and comment on key issues nationwide, with detailed outlines and summaries of cases, legislation, trends, and developments. Use the Annual Review for updates in your specialty area, when you are asked to consider issues that cross over multiple areas of specialty, or to give an initial reaction to a new situation. The Humvee, the modern-day US military four-wheel-drive successor to the Willys Jeep, is used by numerous armed forces around the world and in some civilian adaptations. Over 10,000 Humvees were deployed in numerous roles by coalition forces during the Iraq war. At least 25 variants of this highly versatile vehicle have been produced, from unarmoured light transport to surface-to-air missile platform, including ambulances, tracked versions, troop carriers and special ops variants. This manual provides a unique insight into the world of military Humvees, with an emphasis on military operation and equipment. Popular Mechanics inspires, instructs and influences readers to help them master the modern world. This document records the oral and written testimony of witnesses at a Congressional hearing on U.S. needs for training in high technology areas. Testimony was given by local officials, corporate officials, a union representative, and two professors of engineering from universities in Indiana. Testimony centered on jobs and job training, reforming the education system, and international competition. Witnesses testified that government regulations that cause excess paperwork and prevent industries from being competitive should be changed. They also talked about the burdensome health care system that saps productivity with ever-rising costs as well as the need for workers to learn new skills. Skills in life management, conflict resolution, cooperation, and problem solving were advocated for workers. Witnesses also advocated more cooperative problem solving and strategizing by the various sectors of the economy. (KC)
