An exciting new series of study guides that lets each student design a course of study pitched to his or her individual needs and learning style

Each year, more than one million U.S. high school students take one or more advanced placement (AP) exams, and, according to official projections, that number will continue to rise in the years ahead. That is because AP exams confer important benefits on those who do well on them. High AP scores are indispensable to gaining admission to most elite colleges. They provide students with a competitive edge when competing for grants and scholarships. And they allow students to bypass required university survey courses, saving on skyrocketing tuition fees.

Designed to coincide perfectly with the most current AP exams, *Five Steps to a 5 on the Advanced Placement Examination* guides contain several advanced features that set them above all competitors. Each guide is structured around an ingenious Five-Step Plan. The first step is to develop a study plan, the second builds knowledge, the third and fourth hone test-taking skills and strategies, and the fifth fosters the confidence students need to ace the tests. This flexible study tool is also tailored to different types of students. For the more structured student there is a "Month-by-Month" approach that follows the school year and a "Calendar Countdown" approach that begins with the new year. For students who leave studying until the last minute "Basic Training" covers the basics in just four weeks. Other outstanding features include: Sample tests that closely simulate real exams. Review material based on the contents of the most recent tests. Icons highlighting important facts, vocabulary, and frequently-asked questions. Boxed quotes offering advice from students who have aced the exams and from AP teachers and college professors. Websites and links to valuable online test resources, along with author e-mail addresses for students with follow-up questions. Authors who are either AP course instructors or exam developers.

Kaplan's AP Calculus BC Prep Plus 2020 & 2021 is revised to align with the latest exam. This edition features more than 1,000 practice questions in the book and online, complete explanations for every question, and a concise review of high-yield content to quickly build your skills and confidence. Test-like practice comes in 6 full-length exams, 15 pre-chapter quizzes, 15 post-chapter quizzes, and 22 online quizzes. Customizable study plans ensure that you make the most of the study time you have. We're so confident that AP Calculus AB Prep Plus offers the guidance you need that we guarantee it: a

studying with our online resources and book, you'll score higher on the exam—or you'll get your money back. To access your online resources, go to kaptest.com/moreonline and follow the directions. You'll need your book handy to complete the process. The College Board has announced that the 2021 exam dates for AP Calculus AB will be May 4, May 24, or June 9, depending on the testing format. (Each school will determine the testing format for their students.)

Expert Guidance We know the test—our AP experts make sure our practice questions and study materials are true to the exam and know students—every explanation is written to help you learn, and our tips on the exam structure and question formats will help you avoid surprises on Test Day. We invented test prep—Kaplan (kaptest.com) has been helping students for 80 years, and 9 out of 10 Kaplan students get into one or more of the top choice colleges. The main goal of this third edition is to realign with the changes in the Advanced Placement (AP) calculus syllabus and the new types of AP exam questions. We have also more carefully aligned examples and exercises and updated the data used in examples and exercises. Cumulative Quick Quizzes are now provided two or three times in each chapter. Provide a review of the relevant math topics, test-taking tips, and five practice tests with answers.
