Comprehensive Manual of Ophthalmology in which sufficient information has been provided in easy-to-understand language with a definite and uniform format. Many tables have been incorporated for summarizing key facts about different diseases. Enough standard colored illustrations will be of immense help. A short list of Further Readings has been added at the end of each chapter for those who want to persue further on the particular topic. I consider this humble endeavor as a mini textbook of ophthalmology in a refreshingly reader-friendly fashion, which I presume will be quite useful for both undergraduate and postgraduate students, residents and even practicing ophthalmologists.
