Science Education in East Asia
Jan 27 2020 This book presents innovations in teaching and learning science, novel approaches to science curriculum, cultural and contextual factors in promoting science education and improving the standard and

achievement of students in East Asian countries. The authors in this book discuss education reform and science curriculum changes and promotion of science and STEM education, parental roles and involvement in children's education, teacher preparation and professional development and research in science education in the context of international benchmarking tests to measure the knowledge of mathematics and science such as the Trends in Mathematics and Science Study (TIMSS) and achievement in science, mathematics and reading like Programme for International Student Assessment (PISA).

Among the high achieving countries, the performance of the students in East Asian countries such as Singapore, Taiwan, Korea, Japan, Hong Kong and China (Shanghai) are notable. This book investigates the reasons why students from East Asian countries consistently claim the top places in each and every cycle of those study. It brings together prominent science educators and researchers from East Asia to share their experience and findings, reflection and vision on emerging trends, pedagogical innovations and research-informed practices in science education in the region. It provides insights into effective

educational strategies and development of science education to international readers.

Aug 04 2020 Darwin Reid
Payne's approach to theatrical design is that of a computer advocate and pioneer. With Computer Scenographics, he ushers in a new generation of scenery design by applying state-of-the-art technology to the traditional methods of scenography. Though not a how-to book, Computer Scenographics is a general introduction to, and an affirmation of, the value of computer graphics for both student and working scenographers. Payne

acknowledges that many scenographers would not want to use computers exclusively in the preparation of their designs. Today's scenographers continue to value the manual skills of drawing and painting, learned and perfected over time, and would not consider abandoning these skills entirely. And it is unlikely that the most powerful computer or most sophisticated software could ever supplant that intimate interaction of hand and mind provided by traditional tools and materials. Nevertheless, Payne's utilization of the Virtus Walk-Through computer program to facilitate set design expands the tools of the artist to new

dimensions. Aided by 129 illustrations, Payne addresses four major topics: (1) how computer studios are set up; (2) how computers serve as storage for visual ideas and as conceptual tools; (3) how technical information needed for producing a scenographer's ideas onstage is created with computers; (4) and how modelmaking has been changed by computer-generated three-dimensional possibilities, especially by the introduction of "virtual reality" onto the computer platform.

Expanding your English and Creative Skills through Art and the Humanities Jun 01 2020

Are you interested in Art and the Humanities? Have you been learning English for a long time but do not have enough confidence to carry out tasks in these fields efficiently? Would you like to learn the necessary strategies and skills?

Expanding your English and Creative Skills through Art and the Humanities has been

designed for students or professionals who would like to use and improve their English in areas such as history, art history, literature, film and media, and language, at an upper-intermediate or advanced level. This book integrates practice of the four skills (reading, listening, speaking and writing) and has been written from a holistic and humanistic approach. An important aspect that is emphasized is how to acquire intercultural competence in a globalized world. The approach is a very practical one. You will learn how to carry out tasks such as commenting on artistic and multimedia materials, providing conservation advice,

advertising a product or service, making a successful speech or oral presentation, and writing your own curriculum vitae. All the skills that will help increase your confidence in using the English language!

Taking Part in Democracy

Jul 03 2020 This is a manual for teachers in Education for Democratic Citizenship (EDC) and Human Rights Education (HRE), EDC/HRE textbook editors and curriculum developers. Nine teaching units of approximately four lessons each focus on key concepts of EDC/HRE. The lesson plans give step-by-step instructions and include student handouts and background information

for teachers. In this way, the manual is suitable for trainees or beginners in the teaching profession and teachers who are receiving in-service teacher training in EDC/HRE. Experienced teachers may draw on the ideas and materials. The complete manual provides a full school year's curriculum for students in upper secondary school (grades 10 to 12), but as each unit is also complete in itself, the manual allows great flexibility of use. The objective of EDC/HRE is the active citizen who is willing and able to participate in the democratic community. Therefore, EDC/HRE strongly emphasises action and task-based learning.

This manual for upper secondary level focuses on key competences that enable young people to participate in democratic decision making and to meet the challenges of a dynamic pluralist society. Key concepts of EDC/HRE are taught as tools of lifelong learning.

Analyzing Classical Form

Mar 23 2022 Analyzing Classical Form builds upon the foundations of the author's critically acclaimed Classical

Form by offering an approach to the analysis of musical form that is especially suited for classroom use. Providing ample material for study in both undergraduate and graduate courses, Analyzing Classical Form presents the most up-to-date version of the author's "theory of formal functions."

Students will learn how to make complete harmonic and formal analyses of music drawn from the instrumental works of Haydn, Mozart, and Beethoven. Part 1 introduces the principal theme-types of classical instrumental music; part 2 provides a methodology for analyzing sonata form, the most important formal type in this style period; and part 3

considers other full-movement forms found in this repertory (such as minuet, rondo, and concerto). The chapters are organized in a way that presents the most basic materials upfront and then leads the student through more details and finer points of theory. Every topic is illustrated with annotated musical examples; as well, the book contains many unannotated examples that can be used for in-class discussion and for out-of-class analytical exercises. A complete glossary of terms and questions for reviewing the theory will help students assimilate the many theoretical concepts employed in the book. A companion

website hosted by the author at music.mcgill.ca/acf/ provides audio and musical scores for all of the examples in the book as well as additional examples for the analysis of the simple theme-types presented in part 1.

Chop-Monster Feb 07 2021

Chop-Monster is a sequential jazz improvisation method by acclaimed jazz pianist and educator Shelly Berg that utilizes a "call-and-response" approach: students listen to a jazz idea, imitate it until it is internalized, and then "try it on their own." In *Chop-Monster* 1, students will hear and improvise to the Ima7, iimi7, and V7 chords in the key of B-flat, plus a basic blues

progression. In *Chop-Monster* 2 students will hear and improvise to the ii-V-I progression in three keys (concert B-flat, E-flat, F).
